

## DIGITAL DIMMER

### LLD.WR66

This dimmer is designed for many applications for meeting the increasing demands in the architecture field. It is light and shock-proof for easy maintenance.

Its elegant design, with graceful lines and a simple control panel is 100% digital. It is equipped with an intelligent cooling system which reduce temperature and noise. This unit has also a high-performance microprocessor.

### Specifications

Circuits	6 circuits of 6 KW
Cooling	Natural convection
Control	DMX512 1990 - 2 inputs, any type of load
Outputs	Between 110 and 245 V
Response time	20ms, 80ms, 160ms
Power supply	Single phase or three phase
DMX address	Individually or by group
Curves	4 preset curves + custom curves
