

VOLUME CONTROLLERS 36W

LTS.AT36R

The range of attenuations answers to your expectations in terms of flexibility and adaptation to your sound security installations. The attenuator 36W has a level shifter relay which, when this relay receives a command from the security central, to put the level at its maximum regardless of the position of the attenuator.

This attenuator can be imbed in a box of electrical installation but can be protrusive mounted by the use of ABS box proposed in option (LTS.EC3) Finally, the design of this attenuator is current and will succeed your integrations.

Specifications

| | |
|---------------------|----------------------------|
| • Rates power | 36 watts |
| • Line input | 100 volts |
| • Attenuation | Per step 3 dB |
| • Total attenuation | 33 dB / 10 positions + off |
| • Mounting | White / ABS |
| • Dimensions | 80 x 80 x 48 mm |
| • Applications | General / security sound |
